

### **RELEASE INFORMATION:**

Any player selected for a team with JFC 2010-2011 Season and beyond who **DID NOT** play with JFC last year will need to go to the MSA site online ([www.mississippisoccer.org](http://www.mississippisoccer.org)) and complete a Request for Release. Go to Download Forms and click on link "Request for Player Transfer or Release". [http://www.mississippisoccer.org/Top\\_Nav/Parents/Transfer\\_Release.htm](http://www.mississippisoccer.org/Top_Nav/Parents/Transfer_Release.htm). You will then select "Player Release Request". You will need a player name and password to proceed. You will probably need to click link that says to have login information sent to email and enter your email address. Once you get logged in, you will see the following selections. Enter the following:

- **Current Club where you are domiciled:** select your home domain club. This isn't necessarily the club you played for last year but is the club in territory you currently reside in. (ex: if you played for Brilla last year but live in Flowood, your release will come from NWRAA)
- **Club you would like to move to:** select Jackson Futbol Club
- **Players DOB**
- **Players Gender**
- **Current Playing Division:** select Division 1 Select or Division 3 Recreational
- **Current Age Group:** enter age group you are playing 2010-2011
- **Person Submitting the Form:** enter your name
- **Relationship to Player:** enter this info
- **Reason for Request:** enter that player has been selected to play for a JFC team
- **E-Mail Address:** enter email that you want confirmation info sent to

Once all this information is entered, click "continue" and you will be directed to page to pay the \$10 fee. JFC has nothing to do with this \$10 fee. This is a MSA fee. If you are unsure of what club you are currently domiciled in, or MSA Registrar Barbara Brent at [registrar@mississippisoccer.org](mailto:registrar@mississippisoccer.org)

NOTE: a player must be on the MSA approved roster 14 days prior to first MSA League event. With this in mind, it is important to go ahead and get this Release process started.
